

Tableau saisonnier suisse des fruits et légumes et ventes promotionnelles

Le tableau saisonnier suisse des fruits et légumes indique les mois durant lesquels ces produits arrivent tout frais récoltés sur le marché et sont par conséquent de saison. Les mois appropriés sont signalés en orange. Ainsi, la saison des prunes dure de juillet à septembre. En ce qui concerne les groseilles, juin et septembre sont des mois dits de transition (en orange clair), c'est-à-dire des mois durant lesquels la saison commence ou s'achève.

Les ronds indiquent durant quels mois chaque catégorie de légumes et de fruits est vendue à un prix promotionnel. Les promotions fréquentes sont indiquées par trois ronds, les promotions accrues par deux ronds et les promotions occasionnelles par un rond, tandis que celles qui sont rares le sont par un trait. Les données d'observation du marché des années 2004 à 2009 ont servi de base d'évaluation.
